PRICING MODEL

Our With Robots Offshore Studio offers a flexible model that can be built to suit your needs. Whether you're looking to engage us to deliver your project end-to-end, or simply want to tap into specific capabilities to support or augment your existing team, we are here to help.

To power this flexibility and make it easy to integrate us into your requirements, we are comfortable working on both fixed deliverable rates or time and materials structures. Thanks to our blended offshore and onshore setup, with either model you will benefit from up to **40% savings** on standard rates, **24 hour delivery coverage**, and access to **industry leading expertise across global markets**.
